Contact Person: Lynette Martinez

What is Weatherization?

- Weatherization is a program aimed to save you \$\$\$ on your heating and electric bill.
- Weatherization finds air leaks in the home and takes different measures to stop the leaks so more heat stays in the home thereby saving you \$\$\$ on your heating bill.

HEATING BILL:

The following measures may be taken in your home:

Caulk around window frames and loose glass
Replacement of broken glass
Weather-stripping around doors and windows
Patch cracks and holes in exterior walls
Installation of insulation *if recommended by computer energy audit*

ELECTRIC BILL:

Your refrigerator will be analyzed for Kilowatt hour usage and ***IF*** the computer energy audit calls for replacement you will receive a new refrigerator.

LIGHTING:

Standard light bulbs will be replaced, where possible, with energy saving compact fluorescent bulbs.

HEATING APPLIANCES:

All gas burning appliances will be tested for safe and efficient operation
Furnaces/Heaters will be replaced ***IF*** necessary

HEALTH AND SAFETY:

Carbon Monoxide Detectors and Smoke Alarms will be provided for every household that is not already equipped.
Gas operated Water Heaters will be inspected for Carbon Monoxide and efficiency and may be repaired or replaced ***IF*** needed.

*******NOT* every measure will be applied to every home. A trained unit assessor will decide what measures will apply to each dwelling according to regulations*******

Weatherization is not a remodeling program nor is it a door and window company.
